# School Bus Lights

SafeBus

100 Series LED School Bus Lights
Surface, Window & Roof Mount

Introducing the SafeBus 100 series, a comprehensive selection of school bus lights designed to meet the requirements of all Australian states and territories. Our range offers a wide variety of universal and custom-made fitting options, catering to all buses available in the Australian market.

Featuring our flood-light type LED core light module, our lights provide exceptional illumination with a maximum brightness of over 1900 candela and are suited to electrical systems from 12V to 24V. Versatile in installation, the lights can be mounted on glass, roofs, or any vertical surface. The slim-line window mount lights allow room for bus air vents.
